

# SOLUTION DYED NYLON

## The yarn

This carpet collection has been made from special yarns. The polyamide fiber that is used, has unique characteristics. The carpet is 100% UV-resistant, maintenance friendly and 100% bleach proof.

## Colour to the core

In the case of standard carpet yarn the dye colour is only surface deep (like an apple). The yarn used for the Resistanz collection is coloured to the core (like a carrot) so that there are no colour differences caused by UV and heavy cleaning.

- ✓ UV-resistant
- ✓ Maintenance friendly
- ✓ Bleach proof

Resistanz justifies its name: it resists external influences and thus extends carpet life.

Standard carpet

Because of the trilobal shape of the fiber soil stays on the surface which makes cleaning easier.

Solution Dyed Nylon carpet

## Sustainable

As the yarn is produced in the required colour, there is little waste. Hardly any water is used and production is pollution free. Because of the dirt resisting characteristics of this yarn there is no need for an additional protective coating. So production of Resistanz carpet is very environmentally friendly.

Carpet that stands a good deal ...

Discover the unique characteristics of this Solution Dyed Nylon carpet collection from Belakos Flooring. Suitable for both residential and commercial use!

**RESISTANZ**  
SOLUTION DYED NYLON

**100%** > MAINTENANCE FRIENDLY  
> BLEACH PROOF  
> UV-RESISTANT

Carpet that stands  
a good deal ...

#### UV-resistant

This carpet cannot fade by sunlight, which is perfect in the case of installation behind large windows.

So no colour difference when  
moving your furniture.

#### Maintenance friendly

When it comes to maintenance Resistanz carpet is unique. Dirt stays on the fiber and does not absorb into it. Cleaning is easier and, moreover, common cleaning agents do not affect either the colour or the fiber.

#### Bleach resistant

In case of tough stains cleaning with a mixture of water and bleach will make the carpet look as new. A comprehensive maintenance guide is available at our website [www.belakosflooring.com](http://www.belakosflooring.com).

*ATTENTION: Using bleach on normal  
carpet will irreparably damage it!*
