

**Belakos has many years of experience in the production of custom-designed carpets. Whether you are looking for wall-to-wall carpeting, carpet tiles or rugs, you can combine the colours of your choice to create a fully customised design.**

### Solution Dyed Nylon yarn (SDN)

Our custom-made designer carpets are made from the best yarns from the Resistanz collection. Resistanz lives up to its name: it is resistant against exterior influences, which considerably extends the carpet's life. The special polyamide fibre used in the Solution Dyed line has a number of unique properties.

### UV-resistant

This carpet cannot fade by sunlight, it is totally colourfast which is perfect in the case of installation behind large windows.

### Maintenance friendly

When it comes to maintenance Resistanz carpet is unique. Dirt stays on the fiber and does not absorb into it. Cleaning is easier and, moreover, common cleaning agents do not affect either the colour or the fiber.

### Bleach resistant

In case of tough stains cleaning with a mixture of water and bleach will make the carpet look new. A comprehensive maintenance guide is available at our website [www.belakos.nl](http://www.belakos.nl).

### Sustainable

As the yarn is produced in the required colour, there is little waste. Hardly any water is used and production is pollution free. Because of the dirt resisting characteristics of this yarn there is no need for an additional protective coating. So production of Resistanz carpet is very environmentally friendly.

Product Specification	Medium Commercial	Heavy Commercial
Touch Design Tuftweave	Medium Commercial	Heavy Commercial
Construction	1/10" cut pile / loop pile or a combination	1/10" cut pile / loop pile or a combination
Width	400 cm	400 cm
Pile material	Solution Dyed Nylon (SDX)	Solution Dyed Nylon (SDX)
Pile weight	± 1000 g/m <sup>2</sup> *	± 1200 g/m <sup>2</sup> *
Total weight	± 2250 g/m <sup>2</sup>	± 2470 g/m <sup>2</sup>
Total height	± 10mm	± 10mm
Tuff density	139.200 /m <sup>2</sup>	168.300 /m <sup>2</sup>
Secondary backing	Fusionbac (FB)	Fusionbac (FB)
Flammability	Cfl-s1	Cfl-s1
Gebruiksklasse/ Intensity of use	32 – medium commercial	33 – heavy commercial

# Custom design

## Custom Design

We provide our clients with the possibility to differentiate themselves by designing their own unique carpet. By following a few simple steps a personalised design can be made which fits your personal preferences.

## How it works:

1. You can choose a design from our collection, in which colours or design can be altered to better fit your requirements
2. We can also produce a fully custom design of your own making.
3. A digital image of your design is then produced. Any required changes can be made after which another draft will be sent for your approval. Once the design is approved a 50cm x 50cm sample will be made for design and colour only, this will not be a quality sample. After final approval is given factory production will be planned.

A custom designed carpet can be produced at a minimum area of 400m<sup>2</sup> in which 2 to 6 colours can be chosen. For the production of smaller quantities a supplement will be charged. For Hotel projects a mock up room can be produced by arrangement. Contact the office for full information.

## Further information

If you are you looking for a unique and extremely strong floor for your office, hotel, restaurant, river cruise ship or other project you can be assured of finding a reliable partner in Belakos!
